-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Claims 4, 5, and 8-16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 23 June 2006.

Applicant's election without traverse of claims 1-3, 6, and 7 in the reply filed on 23 June 2006 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Wendlandt et al. (US 5,861,631, hereafter Wendlandt).

With respect to claims 1-3, Wendlandt discloses an apparatus comprising: a photostimulable unit in the form of a computed radiography plate (fig. 4, element 32); housing to hold the photostimulable unit (fig. 1, element 10); and a sliding panel (fig. 1, element 26) movably coupled to the housing to move between a first position concealing the photostimulable unit and a second position revealing the unit (col. 2, lines 51-58).

Art Unit: 2884

As to claim 6, Wendlandt discloses that the apparatus comprises a release mechanism coupled to the housing to release the cover from the first position (col. 2, lines 51-54).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wendlandt as applied to claim 3 above, and further in view of Struye et al. (US 2004/0124368 A1, hereafter Struye).

Wendlandt does not teach that the CR plate has a concave surface. Struye teaches that a CR plate may have a concave surface (paragraph [0053]). It would have been obvious at the time of invention to one of ordinary skill in the art to use a concave surface as taught by Struye in combination with the CR plate of Wendlandt. The concave surface of the CR plate would be useful, for example, in a apparatus where pressure changes are accomplished by the blowing of air into the inner area of a cassette as taught by Struye.
